

SUPERALGOS

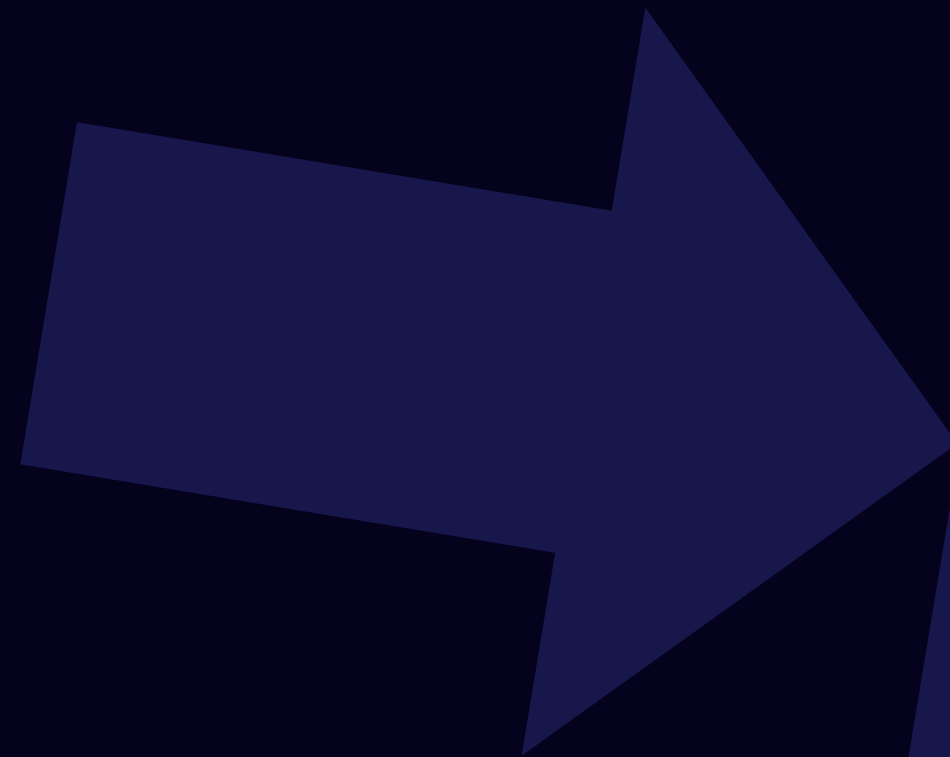

Crowdsourcing Superpowers
for Retail Traders

STATUS QUO | Problem

Institutions

Hire top teams, buy military-grade market intelligence, and develop proprietary technology to master algorithmic trading.

Retail Traders

Play the game alone at an alarming **disadvantage**, with little access to information and using rudimentary tools.

STATUS QUO | Solution

We Crowdfund Superpowers for the Little Guy!

WHO

a community-owned open-source project

HOW

with a decentralized, token-incentivized social trading network

WHY

to help traders get smarter, stronger, and faster

PRODUCT | Superalgos Ecosystem

Superalgos Platform

Free & open-source infrastructure
to build, test, and deploy
trading systems

Incentivized User Base

Technical community
token-incentivized to
broadcast trading signals

Social Trading Network

Broader community following
other people's bots for
automated copy-trading

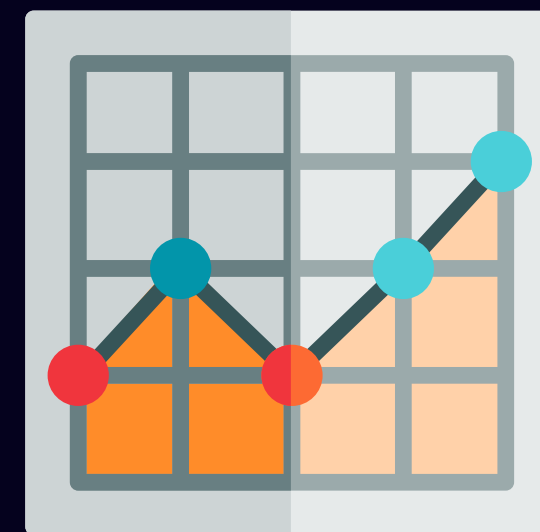

PRODUCT | Superalgos Platform

Integrated Powertools for Competitive Trading Automation

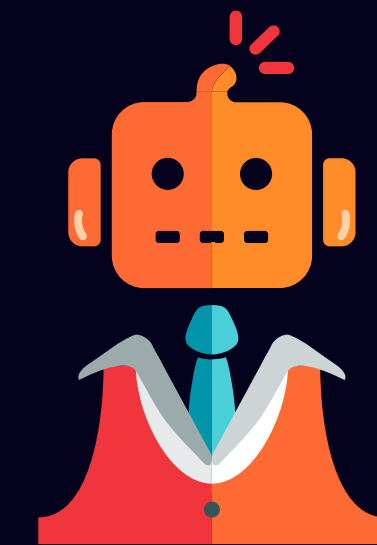

Data Mining &
Visualization

+120 Exchanges
Charting System
Distributed Data-Processing

Strategy Design
& Testing

Visual Design
Visual Debugging
Backtesting & Paper Trading

Risk Management &
Trading Automation

Robust Trading Execution
Portfolio Management
Trading Bot Farms

PRODUCT | Platform Benefits

Zero Friction

Free and open-source
No added counterparty risks

One-Stop Solution

Manage everything in a single package
Scale operations to business size

Power & Flexibility

Unleash sophisticated intelligence
Unlimited backtests, bots, markets, and data

Collaboration

Exchange standardized assets
Deploy decentralized trading organizations

PRODUCT | Decentralized Trading Organizations (DTOs)

Users Start or Join
Trading Teams
Pooling Members'
Skills to Maximize
Collective Intelligence!

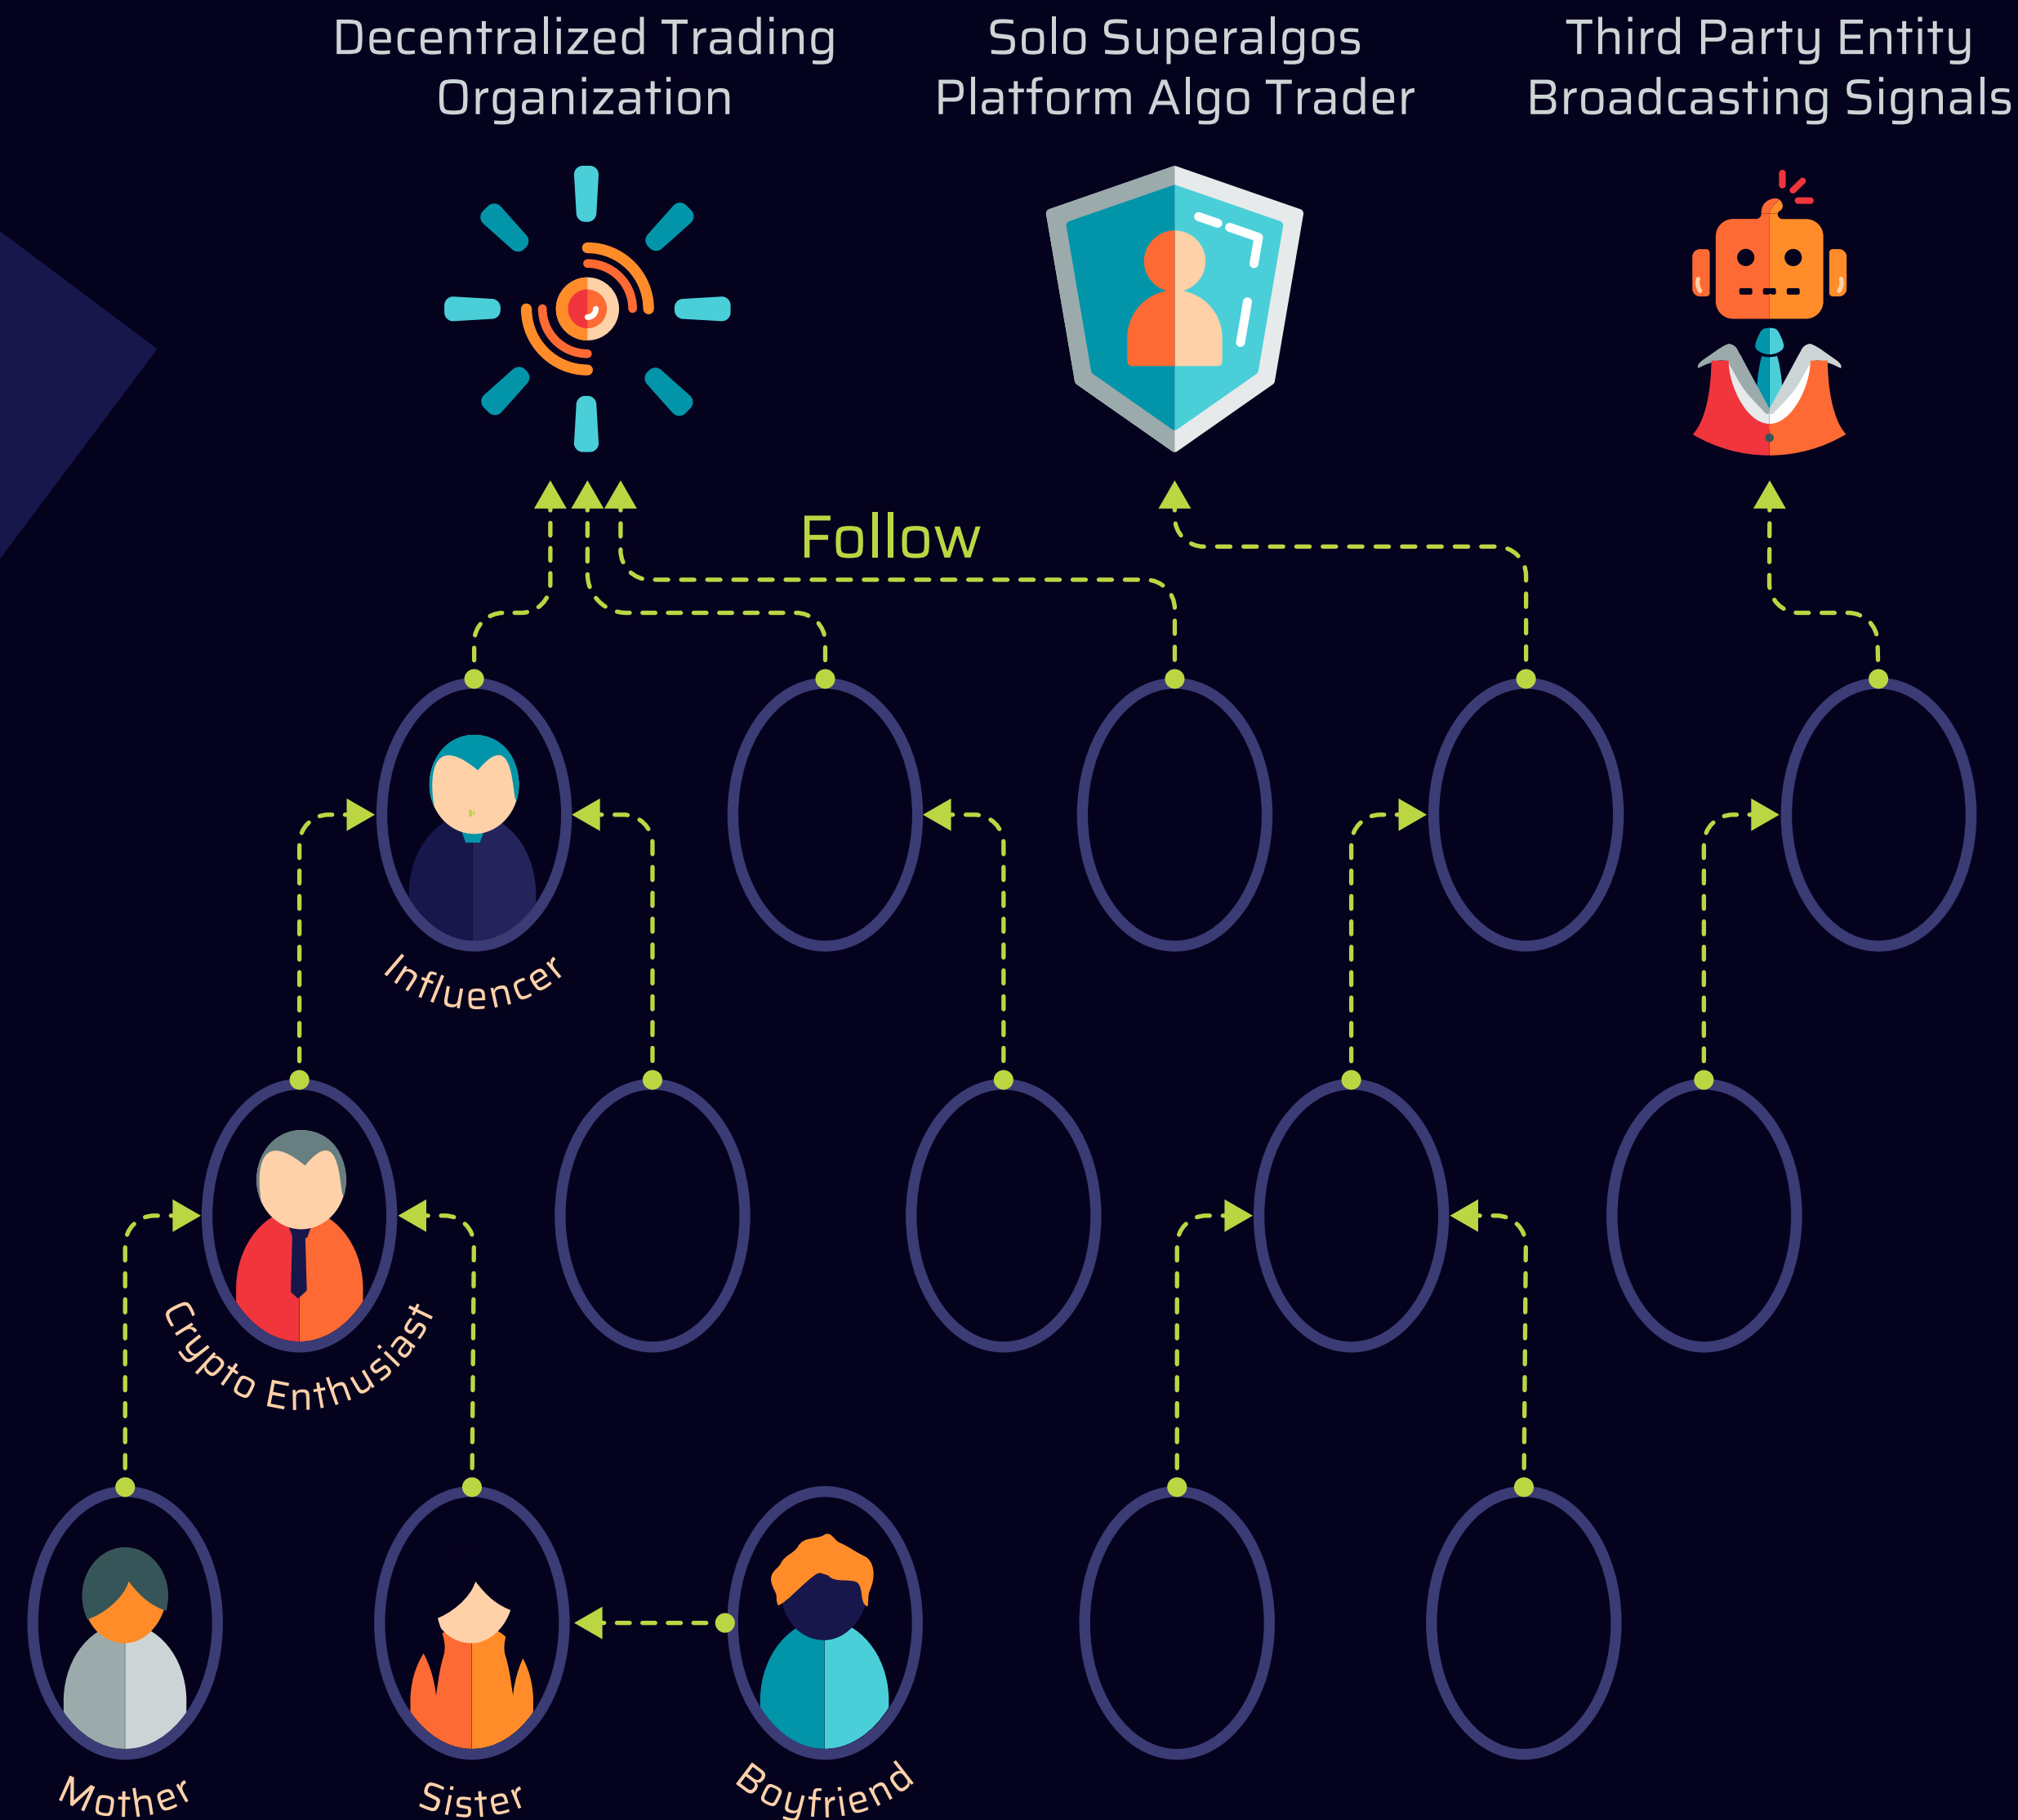

- Produce superior intelligence
- No trusting of funds required
- Use open or closed networks
- Grow from a handful to thousands of members!

PRODUCT | Social Trading Network

Algo Traders
Broadcast Signals
and Compete for
Followers

They earn tokens for each
follower, incentivizing
quality signals and the
protection of users.

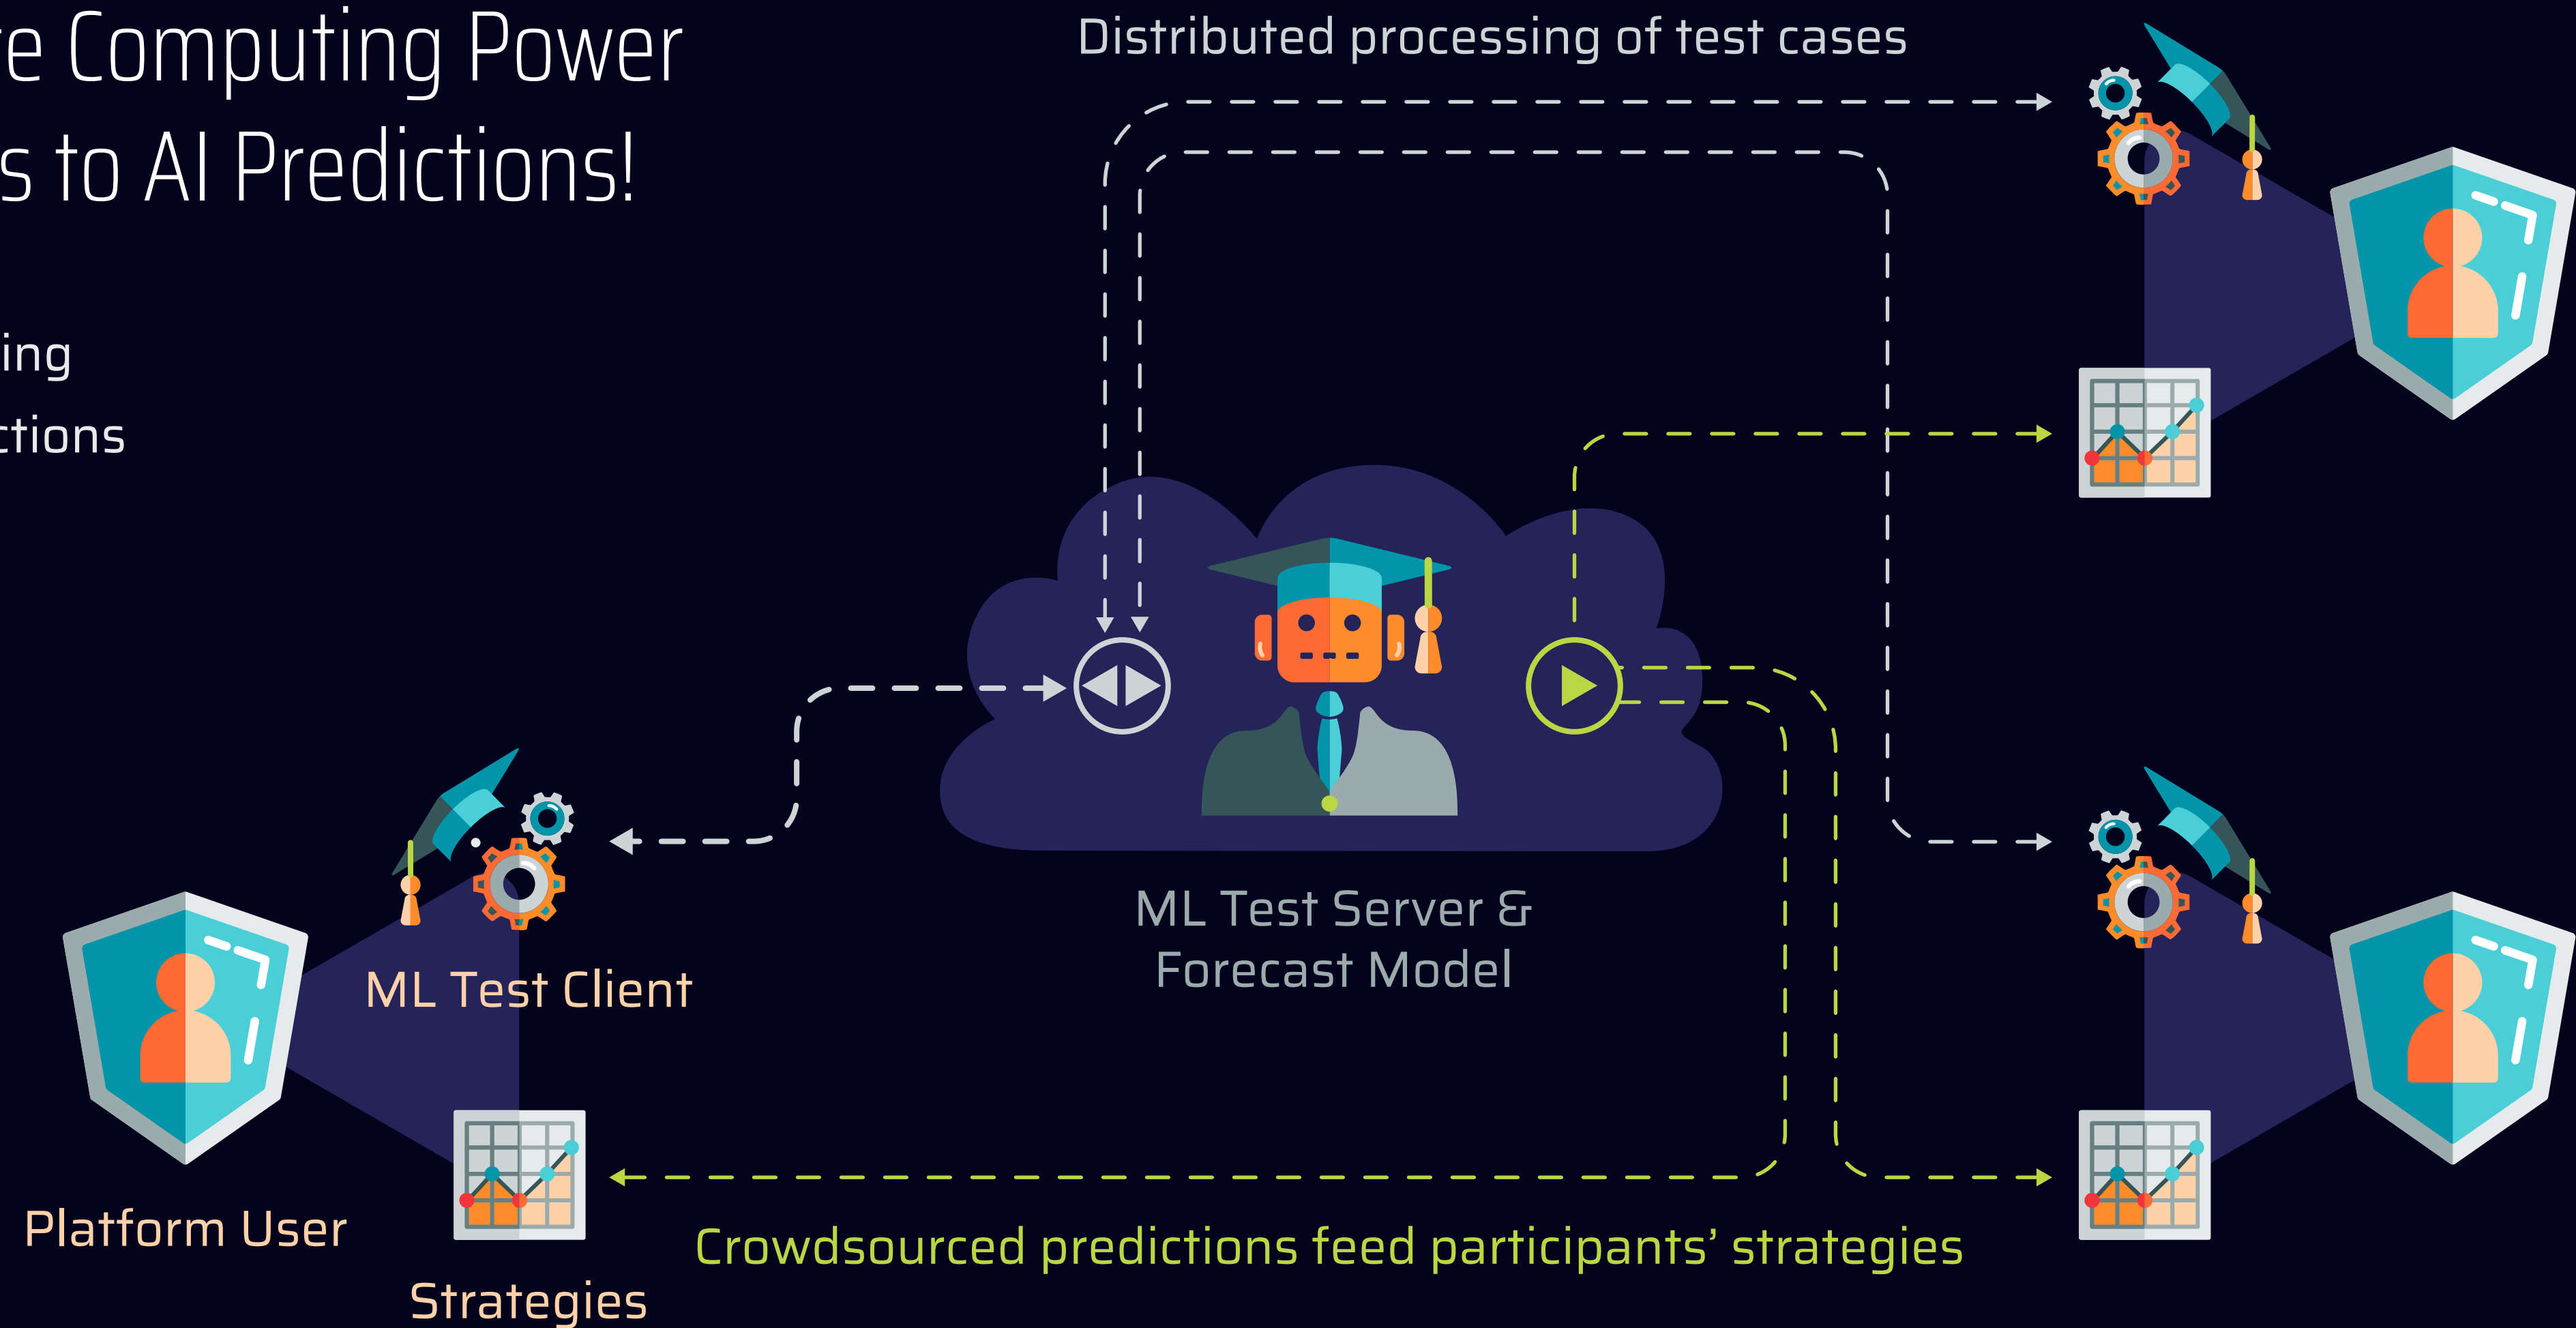

Crypto Users
Follow People
They Trust

They follow and unfollow
signals to optimize
performance, discovering
what works and doesn't.

PRODUCT | Collective AI

Users Contribute Computing Power
and Gain Access to AI Predictions!

- Ever-growing computing
- Ever-improving predictions

PRODUCT | Business Model

Native Token

Community owned
All incentives aligned

Free & Open-Source

Zero friction
Zero entry barriers

Zero Overheads

Community run
Incentivized global development force

PRODUCT | Milestones & Roadmap

MARKET | Traction

1st on Github.com

- 1st on **crypto trading** topic
- 1st on **crypto trading strategies** topic
- 1st for **trading** and **trading bots** searches

Github Drives Talented
Algo Traders with Various
Technical Specialties

A community of smart technical people is
the foundation for a powerful collective
intelligence and contributors' base.

MARKET | Go-to-Market

Incentivizing Contributions
Improves the Project and
Attracts Users in a Positive
Feedback Loop

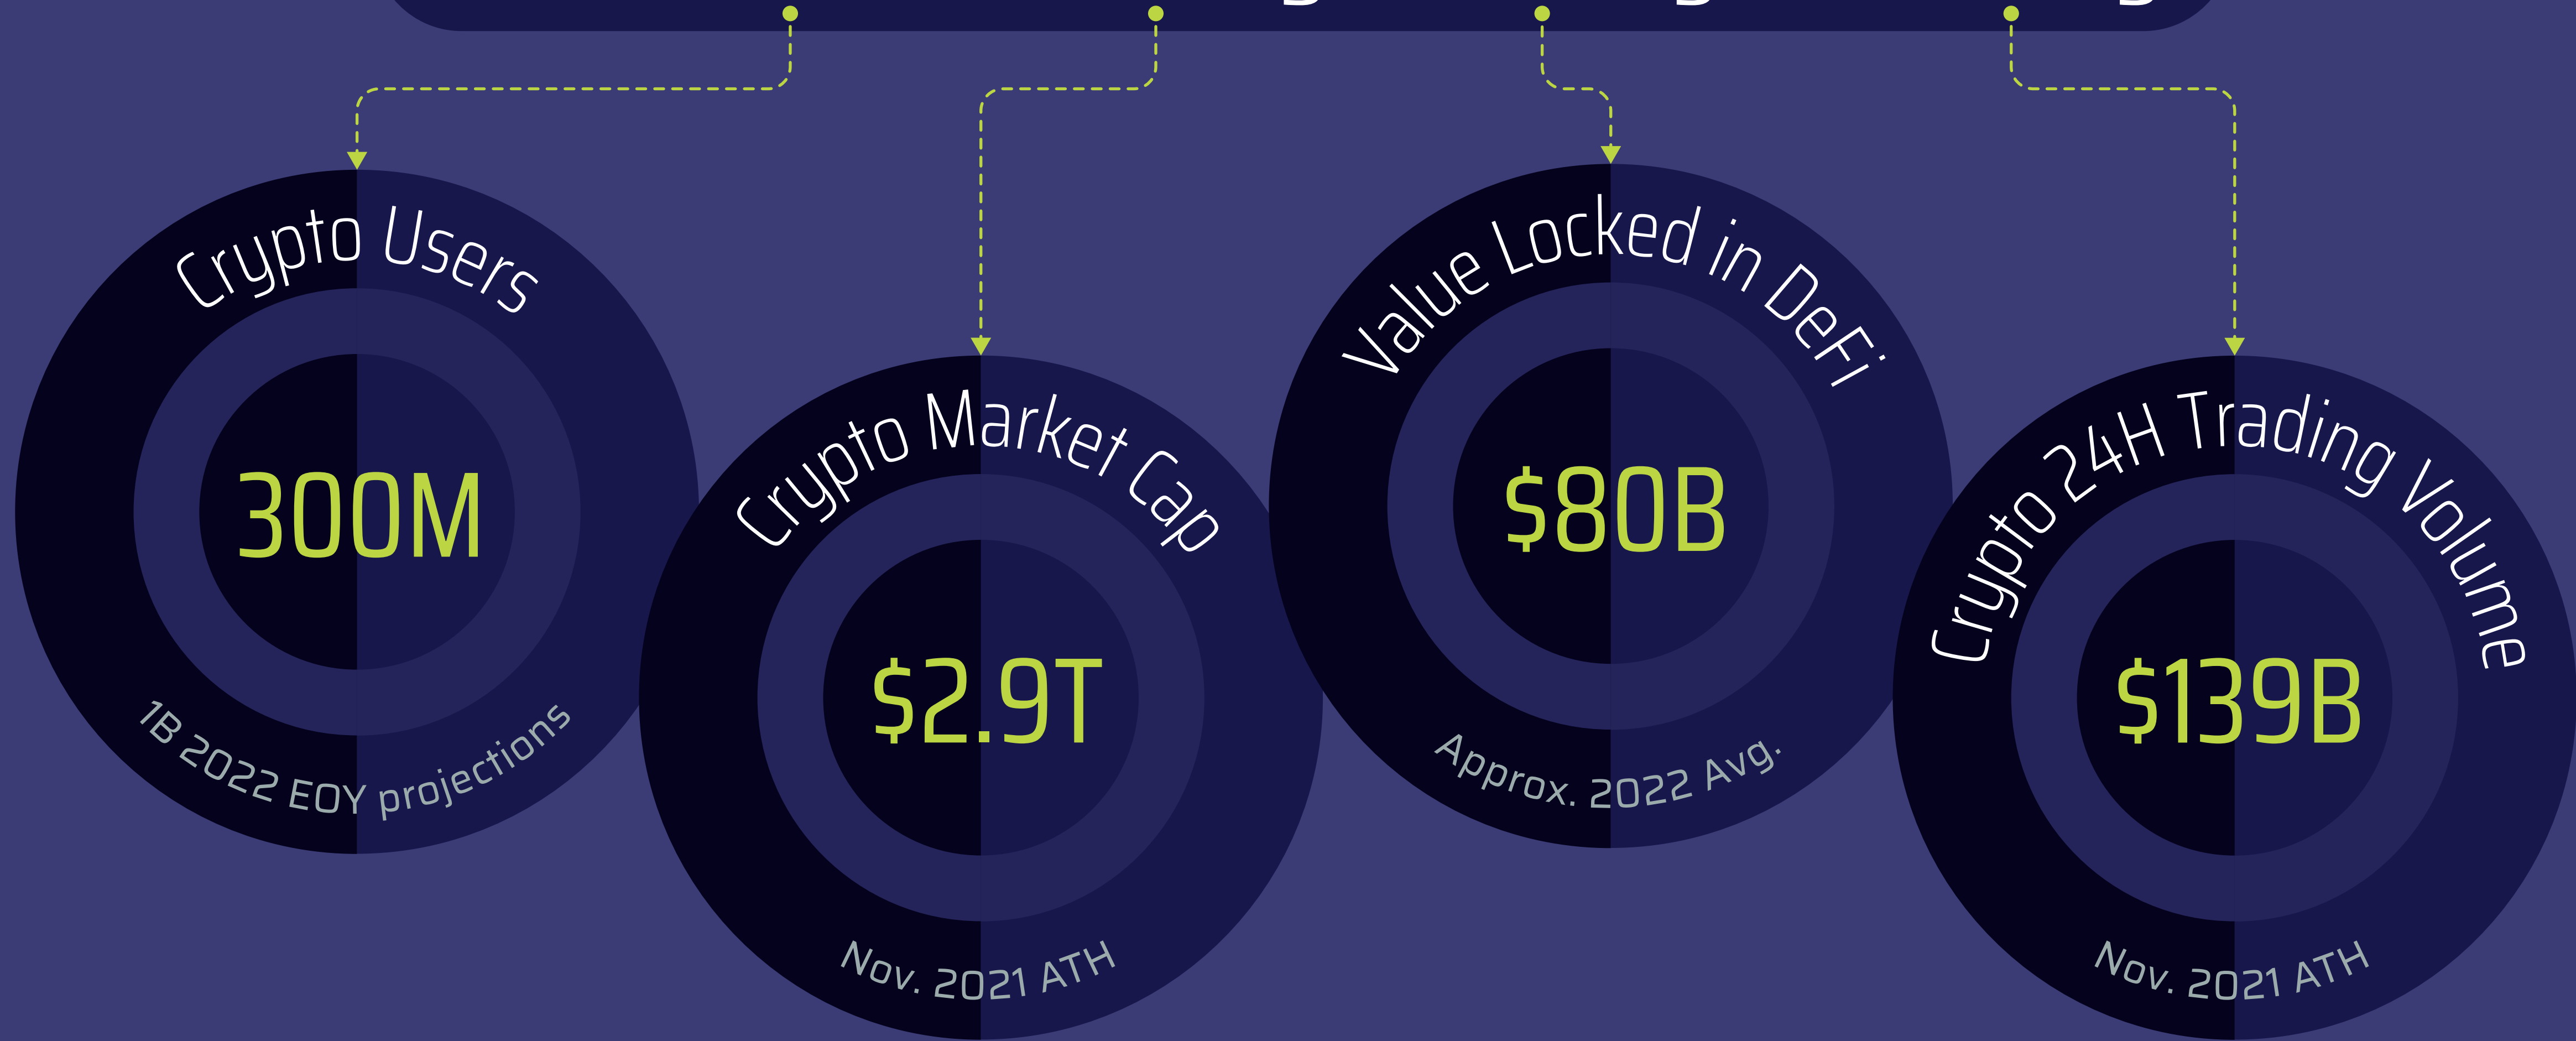

Bitcoin is the most secure network
because the protocol incentivizes
network security.

**Superalgos will dominate decentralized
trading because the project incentivizes
the emergence of trading intelligence!**

MARKET | Total Addressable Market

The Fastest Growing Industry in History

TOKEN | Tokenomics

Economy

- Maximum Supply **1,5B**
- Circulating Supply **535M** (end of 2022)
- Distribution Schedule **128M cap per year** with a halving every six years

Distribution

- Distribution **100% among contributors**
- Frequency **Monthly**
- Mechanism **Distributed Governance System**

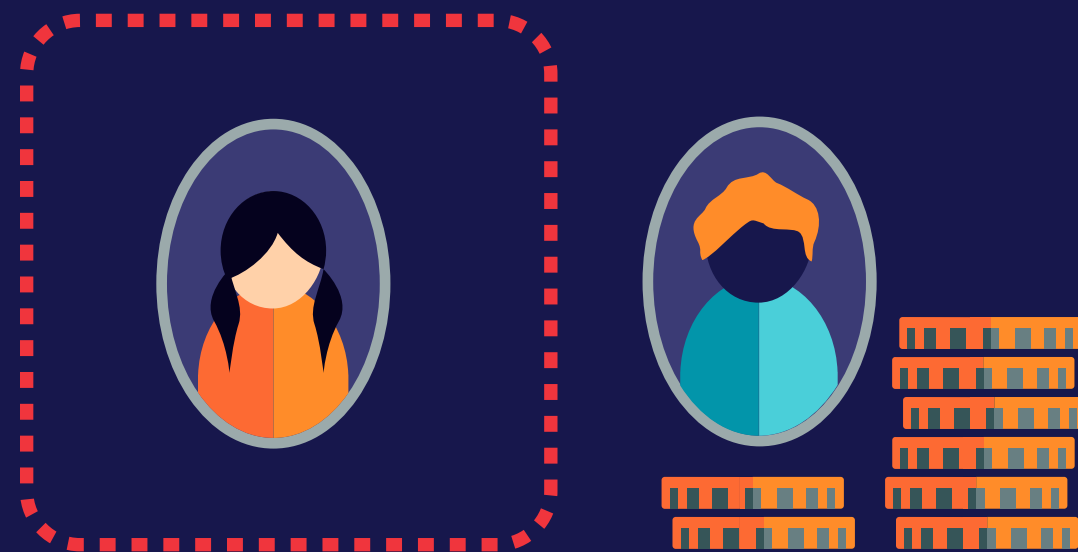

Liquidity

- DEXs **PancakeSwap, 1Inch**
- Liquidity **Bootstrapped**
- Incentives **Liquidity Programs** via the Governance System

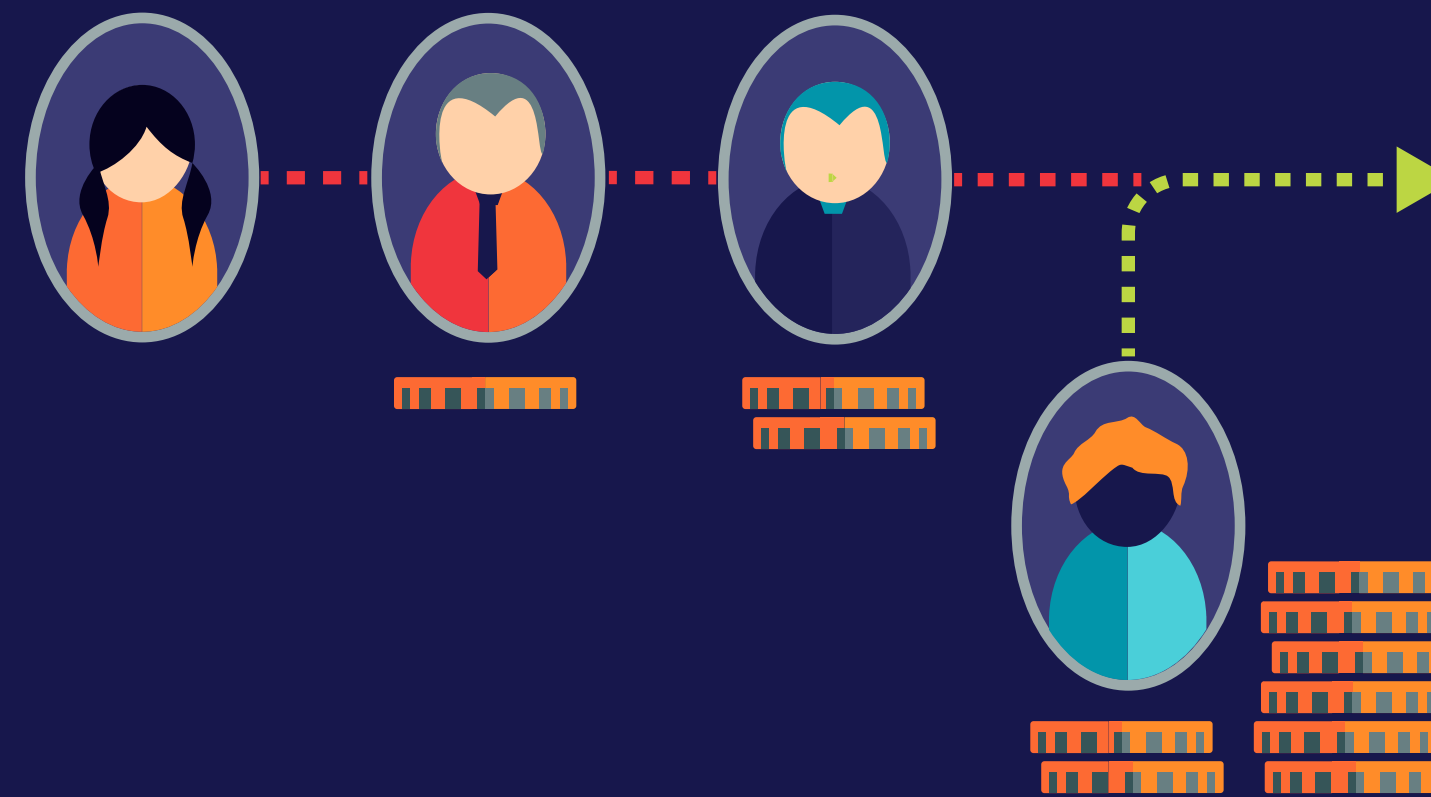

TOKEN | Utility

Premium Access

- Users hold tokens to access premium products and services, like trading signals for copy trading and Collective AI predictions

Priority Access

- Users with a higher balance get signals first
- Exchanges with a higher balance get listed first
- Everything is ordered by token balance

Governance

- Users' token balance represent their influence on governance
